 \*  
 \* IMPORTANT INFORMATION ABOUT YOUR SUBSCRIPTION \*  
 \*  
 \* Foreign Agricultural Trade of the United States is published six times a \*  
 \* year with two supplements. Subscription prices are \$26 a year domestic \*  
 \* and \$32.50 foreign (prices subject to change). Send check or money order \*  
 \* payable to "Superintendent of Documents" to Superintendent of Documents, \*  
 \* U.S. Government Printing Office, Washington, DC 20402. For faster \*  
 \* service, call (202) 783-3238 and charge your subscription to your VISA, \*  
 \* MasterCard, Choice, or GPO Deposit Account. \*  
 \*  
 \*  
 \* IS IT TIME TO RENEW? \*  
 \*  
 \* Your subscription to this publication may be due to expire soon. If so, \*  
 \* you will get a renewal notice in the mail from GPO about 90 days ahead of \*  
 \* time. Only one notice is sent. You must return it promptly to ensure \*  
 \* uninterrupted service. If you have misplaced your renewal notice, use the \*  
 \* form on the back of this report. Be sure to attach mailing label. \*  
 \*

Prepared by the International Economic Indicators Branch, International  
 Economics Division, Economic Research Service, U.S. Department of  
 Agriculture. Principal coordinators were C. Edward Overton, Thomas A. Warden,  
 and Thomasine B. McCall. Mary L. Fant provided statistical support. Judith  
 Placer and Janet Sayre provided word processing and table formatting support.  
 Editorial support was provided by Linda L. Hatcher, Research Information  
 Branch, Economics Management Staff. Data processing support was provided by  
 Sharlan Starr and William Meiller, International Economic System Branch, Data  
 Services Center, and Penni Korb, International Economic Indicators Branch.

# Digest

U.S. Agricultural Exports Fall, Trade Balance Weakens (see p. 2). Export value in the first 9 months of fiscal year (FY) 1986 fell \$4.7 billion to \$20.8 billion compared with the same 1985 period. Volume for October 1985-June 1986 dropped 18 million tons, or 17 percent, to 86 million tons. Delayed purchases by importers in 1986 compounded the negative impacts of significantly lower Soviet grain imports and continued strong crop production overseas.

U.S. Agricultural Imports Continue Strong (see p. 71). Import value in the first 9 months climbed 5 percent to \$15.9 billion from \$15.1 billion in the same months of 1985. Higher prices for such products as coffee, vegetables, and fruits caused most of the gain. Imports of some products, such as sugar, hogs, and pork, declined due to ample U.S. supplies.

Steadier Dollar To Head Off Inflation (see p. 115). The U.S. dollar remained stable in May and June against major currencies. The year-long dollar decline has stabilized since February 1986 as central banks responsible for the depreciation since September now attempt to head off the depreciation's inflationary effects.

Government-Financed Farm Exports Peak in 1985 (see p. 119). Agricultural exports under U.S. Government-financed programs in calendar year 1985 reached their highest level, although the increase over the 1984 level was slight. Export volume increased less than 1 percent to about 8.6 million tons, and value increased less than 3 percent to nearly \$1.88 billion. Increased exports under Section 416 of the 1949 Agricultural Act and the Commodity Import Program offset decreases in exports under Public Law 480.

Japan Remains Top U.S. Farm Market (see p. 129). Japan will remain the leading single-country market for U.S. agricultural exports in FY 1986, as it has been every year since 1963. U.S. agricultural sales to Japan peaked in FY 1984 at \$6.9 billion, fell to \$5.7 billion in 1985, and are forecast to drop to under \$5 billion in FY 1986. Depressed commodity prices and declining U.S. shares in key markets are behind the decline. As U.S. grain and cotton prices become more competitive under new farm legislation, the United States is expected to regain a more normal share of Japan's corn and cotton imports.

See pages 137 and 138 for corrections to the March/April issue of Foreign Agricultural Trade of the United States.

# U.S. Agricultural Exports Fall, Trade Balance Weakens

U.S. agricultural exports fell \$4.7 billion to \$20.8 billion in the first 9 months of fiscal year (FY) 1986 (October 1985-June 1986) compared with the same period in 1985. Particularly weak export movements in May led to the first deficit in the U.S. monthly agricultural trade balance since 1971. May's trade deficit of \$146 million was not repeated in June. While exports declined again, imports also fell sharply, reversing the monthly balance to a surplus of \$87 million. The agricultural trade surplus for the first 9 months totaled \$5.0 billion compared with \$10.4 billion a year earlier.

Importers' delays in 1986 compounded the negative impacts on U.S. agricultural exports of significantly lower Soviet grain imports and continued strong crop production elsewhere overseas. Foreign buyers deferred buying many U.S. farm products in anticipation of lower U.S. export prices later in the year when loan rate reduction or marketing loan provisions of the 1985 Food Security Act become effective.

Export volume fell 18 million tons to 86 million tons, a 17-percent drop from October-June FY 1985. Coarse grains led the decline with a 16-million-ton drop. Wheat exports declined 5.6 million tons, and cotton exports fell 797,000 tons (a 71-percent decline). In contrast, soybean exports rose 3.5 million tons, and soybean meal exports increased 1 million tons. Exports of other feeds and fodders (mostly corn gluten) also rose more than 1 million tons, and volumes for most animal and horticultural products increased.

## Coarse Grain Exports \$2.6 Billion Lower

U.S. coarse grain exports fell to 30 million tons, a 35-percent decline that, combined with lower prices, led export value to fall 45 percent. Although corn exports (which generally account for more than 80 percent of U.S. coarse grain exports) rose slightly from June through May as shipments to the Soviet Union picked up, June's corn export volume was still 1.2 million tons lower than in June 1985. One major factor behind reduced 1986 coarse grain exports is improved Soviet grain production. In 1985, the USSR became the largest U.S. grain customer as a poor crop pushed its import needs to a record high. U.S. exports of coarse grains to the USSR fell 8.4 million tons in 1986 as Soviet import needs fell about 50 percent.

Lower Soviet imports meant Japan regained its position as the largest U.S. coarse grain market in 1986. Coarse grain exports to Japan, however, dropped 1.5 million tons to 9.3 million tons as competition from China and Argentina intensified. Exports to Korea similarly fell 20 percent to less than 1 million tons, partly because of feed wheat sales from Canada and Australia. U.S. sales also dropped substantially to Mexico, Venezuela, the European Community (EC), the Middle East, and South Africa. Sales increased to Eastern Europe and Brazil following drought-reduced crops for these customers. However, no U.S. coarse grain exports went to Eastern Europe and Brazil after March.

### Price Anticipation Lowers Exports

Perhaps the major force reducing U.S. coarse grain exports in FY 1986 was importers postponing purchases in anticipation of lower prices for many U.S. farm products. The next crop year for corn and sorghum will not begin until September, so purchases of these products during the summer months are expected to slow. Sales will likely rise at the beginning of the new crop year as they did for rice and wheat.

U.S. rice exports fell 200,000 tons during 1986 to 1.2 million tons. U.S. rice exports suffered a similar decline during the same period in FY 1985. However, in April 1986, U.S. rice export prices made a widely anticipated drop intended to recapture U.S. world market share, and monthly changes in export volume during 1986 were very different as a result.

Instead of rising during January to April as in previous years, rice export volume tumbled as foreign buyers deferred purchases. Whereas in 1984 and 1985, April exports exceeded January's by 46 and 11 percent, respectively, April 1986 exports were 24 percent below January's.

New and deferred purchases pushed export volume up after April, and by June, exports were nearly 60 percent higher, reversing previous years' patterns of stagnant or declining exports in the months immediately following April.

### Wheat Exports Almost One-Third Lower

U.S. wheat exports during the first 9 months of 1986 fell 5.6 million tons, a 25-percent drop that left volume at 16.9 million tons. As with rice, U.S. wheat prices fell during 1986. The average export value of wheat exported in June was \$127 per metric ton, compared with \$140 per metric ton in May, the last month of the 1985/86 crop year. Some importers temporarily withdrew from the market, and wheat shipments in May tumbled to less than 1.3 million tons, the lowest monthly export volume since February 1972. With the availability of lower priced wheat in June, wheat exports rose 71 percent to more than 2 million tons.

Wheat exports are not expected to rebound completely, however, and will almost certainly fall short of 1985's tonnage for the whole year. For example, June 1986 shipments, although significantly stronger than in the preceding month, fell short of June 1985 shipments by nearly 130,000 tons.

Increased production by some of the largest U.S. customers reduced their import needs in 1986. Brazil and the USSR imported no U.S. wheat in June, despite the favorable shift in prices. Sales to these two countries for the first 9 months of FY 1986 fell from more than 5 million tons in 1985 to less than 400,000 tons. Nigeria's purchases fell from 1.5 million tons in 1985 to 413,000 tons as lower export earnings forced the Nigerian Government to delay issuing import licenses. Exports were also weaker to China, Bangladesh, and the EC.

### Cotton Exports Substantially Lower

U.S. cotton exports during October-June fell 70 percent in volume and 70 percent, or \$1.2 billion, in value because of a reduced market share. Volume declined across the board, with no customer or group of customers accounting for a disproportionate share. Exports to Japan fell from 275,000 to 97,000 tons and those to the EC fell from 215,000 to 59,000 tons. World cotton prices remained

well below U.S. prices as record foreign production drove prices down overseas. U.S. sales are expected to remain weak until August, when provisions of the 1985 farm act become effective and lower U.S. prices.

#### Soybean and Soybean Meal Exports Rise

U.S. exports of soybeans and soybean meal rose 4.9 million tons during October-June largely because the drought in Brazil, which also severely hurt coffee production, reduced soybean yields. Soybean exports reached 18 million tons compared with 14.5 million in the same period of 1985, and soybean meal exports rose 1 million tons to 4.5 million tons. Although U.S. export increases were largest to Western Europe, Soviet purchases in excess of 1.5 million tons also boosted exports. Exports to Japan rose slightly to 3.6 million tons, and significant amounts were also exported to two U.S. competitors, Brazil and China. (Stephen MacDonald, International Economic Indicators Branch)

Fruits - fr - noncitrus	219,121	224,819	3	30,475	33,080
Apples - fresh	96,684	71,771	-26	5,548	2,431
Grapes - fresh	40,985	55,415	35	5,272	5,554
Other noncitrus - fresh	81,452	97,633	20	19,655	25,095
Fruits - dried	121,144	133,457	10	12,121	11,734
Reisins - dried	61,694	71,712	16	5,898	5,989
Prunes - dried	47,489	47,649	0	5,072	4,760
Other dried fruits	11,961	14,096	18	1,152	985
Fruits - canned ex juice	46,639	45,842	-2	4,853	4,895
Fruits - froz ex juice	8,396	9,002	7	871	1,312

Table 4--U.S. agricultural exports: Value (1,000 dol) of selected commodities,  
October-June 1984/85 and 1985/86, and June 1985 and 1986--continued

Commodity	October-June			June	
	1984/85	1985/86	Percentage change	1985	1986
Other fruits - prep or pres	15,797	12,065	-24	1,354	1,283
Fruit juices incl froz	150,655	112,017	-26	18,947	11,151
Orange juice	83,853	52,737	-37	8,773	5,420
Other fruit juices	66,802	59,281	-11	10,174	5,732
Nuts & prep	521,204	548,779	5	43,223	42,819
Almonds(shellled basis)	285,230	298,318	5	27,646	25,196
Peanuts, shelled or prep	139,542	148,995	7	10,152	12,262
Walnuts, shelled/unshelled	62,645	64,723	3	2,103	1,742
Pecans, shelled or unshelled	2,481	2,760	11	248	354
Other nuts, shelled or prep	31,306	33,983	9	3,074	3,265
Vegetables & prep	748,206	783,408	5	85,575	80,052
Vegetables - fr	194,421	184,052	-5	25,328	20,897
Celery - fresh	13,034	13,856	6	1,972	1,367
Lettuce - fresh	30,790	34,195	11	3,279	3,399
Potatoes - fresh	11,070	8,623	-22	3,452	2,239
Tomatoes - fresh	27,404	28,845	5	3,970	2,589
Other fresh vegetables	112,123	98,535	-12	12,655	11,293
Vegetables - froz	70,813	83,994	19	10,422	9,709
Potatoes - frozen	35,200	41,589	18	5,609	4,602
Other frozen vegetables	35,613	42,395	19	4,814	5,107
Vegetables - canned	75,582	76,902	2	8,421	8,487
Pulses	153,737	164,360	7	14,424	11,354
Dried beans	101,734	109,379	8	9,167	8,618
Dried peas	36,212	35,059	-3	3,890	2,421
Dried lentils	15,791	19,922	26	1,367	315
Hops, incl hop ext	43,716	45,535	4	3,647	4,994
Other veg - prep or pres	209,936	228,565	9	23,333	24,611
Oilseeds & prods	5,286,842	5,389,493	2	295,378	322,424
Oilcake & meal	673,589	915,189	36	56,633	87,013
Soybean meal	657,266	902,665	37	55,191	86,713
Other oilcake & meal	16,322	12,523	-23	1,442	300
Oilseeds	3,797,037	3,911,928	3	149,557	184,211
Soybeans	3,420,268	3,739,058	9	114,163	162,209
Sunflowerseeds	270,315	73,732	-73	24,757	13,677
Other oilseeds	69,800	59,903	-14	5,771	3,785
Protein substances	36,655	39,236	7	4,867	4,540
Vegetable oils	816,216	562,377	-31	89,188	51,200
Soybean oil	436,508	201,297	-54	53,134	22,460
Cottonseed oil	116,709	87,155	-25	6,643	6,882
Sunflower oil	79,219	94,815	20	10,309	2,821
Other veg oils & waxes	183,779	179,109	-3	19,102	19,037
Tobacco - unmf	1,305,476	1,149,389	-12	43,996	60,706
Tobacco - burley	290,820	262,654	-10	13,567	16,135
Tobacco - flue cured	886,651	717,309	-19	18,637	32,511
Other tobacco - unmf	128,006	169,425	32	11,792	12,061
Cotton, ex linters	1,730,272	515,758	-70	115,775	20,580
Cotton linters	19,172	11,574	-40	1,495	996
Essential oils	82,409	80,884	-2	9,815	7,700

# U.S. Agricultural Imports Continue Strong

U.S. agricultural import values climbed 5 percent to \$15.9 billion in the first 9 months of fiscal year (FY) 1986 (October 1985-June 1986) from \$15.1 billion during the same months in 1985. Higher prices for both noncompetitive products (such as coffee) and competitive products (such as vegetables and fruits) caused most of the gain. Competitive imports (imports interchangeable with U.S. commodities) in the first 9 months totaled \$9.9 billion, while noncompetitive imports reached \$5.9 billion. Imports of some products declined due to ample U.S. supplies.

Farm product imports in May rose 20 percent over those of May 1985 to \$2 billion, their highest monthly level since January 1986. Imports from developing countries accounted for 60 percent of U.S. agricultural imports and totaled \$9.5 billion compared with \$6 billion from developed countries. Import sources shifted during the first 9 months of FY 1986, with Mexico replacing Brazil as the principal supplier. Imports from Mexico gained 56 percent in value, primarily because of higher values for vegetables, coffee, and live cattle. Imports from Brazil declined 18 percent in value because of lower values for orange juice and coffee. Imports from Canada, the third largest source of agricultural imports in this period, declined 3 percent in value, mainly because of smaller shipments of live hogs and live cattle. The market shares of the EC-12, Colombia, Guatemala, Ecuador, India, and the Philippines also gained.

## Competitive Imports Up Moderately

Competitive imports totaled \$9.9 billion during the first 9 months, down slightly from the year-earlier level of \$10 billion. Imports of such products as vegetables, fruits, and dairy products accounted for most of the increase, nearly offsetting declines for such products as raw sugar, orange juice, pork, and live hogs.

Import volume of sugar reached 187,000 tons in June, 13 percent below the 216,000 tons purchased in June 1985. Sugar imports during the first 9 months dropped 22 percent below the year-earlier level to 1.5 million tons due to lower import quotas. Sugar import values totaled \$516 million, 32 percent less than those of a year earlier. Sugar import unit prices, averaging \$348 per ton, fell 13 percent. U.S. prices of raw sugar averaged 20.67 cents per pound for the first 5 months of calendar 1986, below the market stabilization price of 21.5 cents. Prices should rise slightly during the rest of the year because consumer demand will likely increase seasonally. Domestic sugar use for 1986 is expected to rise for the first time since 1977. The Philippines supplied most of the raw sugar, shipping 14 percent of U.S. import volume, followed by Brazil, the Dominican Republic, and Colombia.

Beef import value during the first 9 months declined 5 percent to \$886 million, as import unit prices slipped 7 percent, while volume gained 3 percent to 483,000 tons. Unit import prices declined mainly because of larger supplies in Australia, increased domestic poultry consumption, and reduced demand for red meat.

Pork imports reached 296,000 tons, down 6 percent from a year earlier. As a result of higher prices, lower import volumes pushed values down marginally to \$645 million. The largest exporters of pork products to the United States are Canada, Denmark, and Poland. Canada's exports to the United States increased 17,000 tons, while Denmark's declined 30,000 tons.

Because of higher prices, cheese imports gained 5 percent over year-earlier levels to \$288 million, while volume remained the same at 101,000 tons. Import unit prices for cheese averaged \$1.29 per pound in the first 9 months compared with \$1.23 per pound the first 9 months of FY 1985. Western Europe provided 70 percent of the cheese volume, with New Zealand shipping 19 percent.

Reduced orange juice imports pushed imports of fruits and preparations down 14 percent to \$1.2 billion. Orange juice import volume declined 27 percent below year-earlier levels to 377 million gallons, and the value dropped 47 percent to \$343 million because of larger domestic orange supplies. However, imports of apples from Chile, canned pineapples from Thailand, and melons from Mexico gained.

Imports of vegetables and preparations gained 17 percent in value during the first 9 months to \$1.3 billion because of increased imports from Mexico, the largest U.S. vegetable supplier. Volume gained 3 percent to 1.9 million tons. Tomatoes, cucumbers, onions, peppers, squash, and eggplant are the major vegetables imported from Mexico. Higher prices increased the value of fresh Mexican vegetables and products to \$578 million compared with \$444 million in the same months of 1985. Canned mushrooms were down 1 percent to \$92 million due to lower prices, but volume increased 26 percent to 53,000 tons. Taiwan, Hong Kong, and China are the leading canned mushroom suppliers, providing 84 percent of the volume.

Oilseed and product values declined 16 percent to \$503 million, due mainly to lower prices for coconut and palm kernel oils. Coconut oil value, accounting for 39 percent of U.S. vegetable oil imports, fell 24 percent to \$169 million. In contrast, coconut oil volume rose sharply to 403,000 tons compared with 273,000 tons in the first 9 months of FY 1985. Oilseed and product volume rose sharply to 1.1 million tons because large vegetable oil stocks reduced prices. Import unit prices averaged \$449 per ton compared with \$642 per ton for the first 9 months of FY 1985. The Philippines and Malaysia supplied most of the oilseeds and products.

Cattle entries in the first 9 months of FY 1986 increased sharply to 1 million head (\$320 million) from 478,000 head (\$205 million) a year earlier. Relaxed export restrictions resulted in increased live cattle entries from Mexico of 802,000 head (\$198 million) from 157,000 head (\$43 million) in the same period of 1985. Only 225,000 head of Canadian cattle entered the United States during the 9-month period, 30 percent fewer than the year-earlier entries. Live hogs from Canada also declined sharply to 386,000 head from over 1.2 million head during the first 9 months of FY 1985 after imposition of countervailing duties.

Grain and feed imports in the first 9 months gained 10 percent in value to \$496 million, mainly because of larger bakery product purchases at higher prices. Biscuit and wafer entries rose from 76,000 tons a year earlier to 93,000 tons in FY 1986. Value increased 27 percent to \$178 million, mainly from Western Europe and Canada.

Unmanufactured tobacco imports, dominated by larger filler leaf purchases at stable prices, increased 9 percent in volume during the first 9 months to 151,000 tons, valued at \$445 million. Filler leaf imports rose from 110,000 tons in the first

9 months in FY 1985 to 126,000 tons in the same period of 1986. Value increased 13 percent to \$409 million, with import unit prices averaging \$1.47 per pound. Turkey, Brazil, and Greece were the principal suppliers of filler leaf.

Wine and malt beverage imports rose 15 percent to \$1.3 billion in the first 9 months, with higher priced wines accounting for most of the increase. Wine volume declined 13 percent as import unit prices gained 28 percent. Italy, France, and West Germany are the major suppliers of wine, with The Netherlands, Canada, West Germany, and Mexico providing most of the malt beverages. Values also gained for other competitive imports, such as fresh cut flowers, cashew nuts, and seeds.

#### Noncompetitive Imports Up Sharply

Noncompetitive import values during the first 9 months rose 15 percent over year-earlier levels to \$5.9 billion. Import values for coffee, accounting for 56 percent of noncompetitive imports, skyrocketed 38 percent over year-earlier levels to \$3.3 billion because of the Brazilian drought. Coffee volume advanced to 931,000 tons, with import unit prices expanding from \$1.32 per pound in the first 9 months of FY 1985 to \$1.63 per pound in the same period of 1986. Brazil, Colombia, Mexico, Guatemala, El Salvador, Indonesia, Ecuador, the Ivory Coast, and Peru were the major suppliers.

Reduced cocoa bean shipments from the Ivory Coast and Ecuador lowered U.S. imports of cocoa and products 10 percent in value to \$902 million. Volume declined 13 percent to 373,000 tons. However, cocoa product values were significantly higher, offsetting declines in cocoa beans. The New York cocoa futures price averaged 91.5 cents per pound in June 1985, but increased world supplies pulled prices back to 81.4 cents per pound in June 1986.

Weak prices depressed rubber import values 13 percent to \$472 million. Volume declined 1 percent to 619,000 tons, with unit import prices declining 12 percent to \$763 per ton. Over half of the U.S. rubber imports came from Indonesia, with nearly all of the remainder from Malaysia, Thailand, Liberia, and Singapore.

Banana imports in the first 9 months showed little change from year-earlier volume of 2.3 million tons because reduced shipments from Honduras, Costa Rica, and Nicaragua were offset by larger imports from Ecuador, Colombia, and Guatemala. Value totaled \$559 million, as unit prices moved down to \$243 per ton. Other noncompetitive imports, notably spices and essential oils, gained in value, but values for tea declined. (Charles E. Goode, International Economic Indicators Branch)

# Steadier Dollar To Head Off Inflation

The U.S. dollar remained fairly stable in May and June against the major currencies most important to U.S. agricultural trade (German mark, Japanese yen, British pound, Dutch guilder, and Canadian dollar). The year-long dollar decline has stabilized since February 1986 as the central banks that brought about the continued depreciation since September now attempt to head off the depreciation's inflationary effects.

Lower oil prices in 1986 have led to lower interest rates, which have lessened demand for dollar assets. After a 25-percent decline between February 1985 and February 1986, the dollar decline has stabilized in recent months. The central banks from the G-5 countries (the United States, the United Kingdom, Germany, France, and Japan), which in September 1985 continued the dollar slide begun in February 1985, are trying to stabilize the dollar to head off possible inflationary effects.

The Japanese and German central banks are particularly active in intervening to prevent the dollar from depreciating further against their currencies, the yen and the mark. The stronger Japanese yen and German mark have already dampened economic growth in these countries because of higher priced exports.

U.S. officials have recently begun stressing the need to help correct the U.S. trade deficit through increased demand growth from abroad, rather than through further dollar depreciation. (Edward C. Wilson, International Aggregate Analysis Branch)

# Government-Financed Farm Exports Peak in 1985

Agricultural exports under U.S. Government-financed programs in calendar year 1985 reached their highest value level, although the increase over the 1984 level was slight. Export volume increased less than 1 percent over 1984 levels to about 8.6 million tons, and value increased less than 3 percent to nearly \$1.88 billion. Increased exports under other programs offset decreases in Public Law (P.L.) 480 shipments. Overseas donations under Section 416 of the Agricultural Act of 1949, as amended, grew sharply and included bulgur wheat in addition to dairy products. Shipments under the Commodity Import Program of the Agency for International Development (A.I.D.) rose significantly over 1984 levels.

## P.L. 480

P.L. 480 shipments in 1985 reached 7.5 million tons, down almost 5 percent from the 1984 total, which was the highest level since at least 1974. Export values reached almost \$1.5 billion compared with \$1.55 billion in 1984. Title I shipments in 1985 barely fell, while Title II shipments dropped a little more than 5 percent. Top recipients in 1985 were Egypt, Sudan, and India compared with Egypt, Bangladesh, and India in 1984. Major commodities in 1985 were wheat, soybean oil, and rice compared with wheat, soybean oil, and flour in 1984.

## Title I

Title I exports in 1985 reached about 4.4 million tons worth slightly more than \$810 million, compared with 1984 exports of nearly 4.5 million tons worth \$830 million. Principal recipients in 1985 were Egypt, Sudan, and Bangladesh, with Egypt accounting for about 25 percent of the total. Wheat shipments reached almost \$445 million (about 3.2 million tons), accounting for 55 percent of the value and almost 75 percent of the volume. Rice was a distant second, with shipments worth about \$110 million (slightly less than 400,000 tons). Exports of both soybean oil and wheat flour reached \$95-\$100 million each. Volumes for the two commodities were about 141,000 tons and almost 426,000 tons, respectively. Egypt, Morocco, and Sudan took about half of the wheat, while the Philippines, Bangladesh, and Madagascar were top rice recipients. Most of the soybean oil went to Pakistan, the Dominican Republic, and Bangladesh, while Egypt, Sudan, and Somalia received all the flour.

Top commodities in 1984 were wheat, wheat flour, and rice. Egypt, Bangladesh, and Morocco were principal destinations for wheat, while flour went mainly to Egypt. Bangladesh, Indonesia, and Liberia received most of the rice.

## Title II

Title II shipments fell 6 percent below 1984's level to more than 3 million tons but still exceeded 1983's level by 50 percent. The value of 1985 shipments also dropped 6 percent in 1985 to \$680 million. India, Ethiopia, and Sudan received more than 40 percent of the value of Title II commodities. Voluntary relief agencies, such as CARE and Catholic Relief Services, distributed slightly less than

half of the value of Title II commodities. Nearly 33 percent of the Title II commodities were shipped through government-to-government agreements, and a little less than 25 percent was distributed through the World Food Program.

Soybean oil, grain sorghums, and corn-soya-milk (CSM) accounted for half the value of Title II shipments. Ethiopia, India, and Sudan were top recipients of the soybean oil, while Sudan, Niger, and Ethiopia received close to 85 percent of the grain sorghums. India, Ethiopia, and Botswana received about 60 percent of the CSM.

Title II shipments were about 3.2 million tons in 1984, worth in excess of \$720 million. Principal recipients were India, Bangladesh, and Pakistan, which together received about 36 percent of the value of shipments. Soybean oil and wheat accounted for more than \$165 million each, and rice shipments were worth about \$64 million. Top soybean oil recipients were India, Ethiopia, and Pakistan. Bangladesh and Pakistan received 80 percent of the wheat shipments, while the Philippines, Mali, and Peru received 45 percent of the rice.

#### Section 416

Section 416 shipments in 1985 reached close to 340,000 tons worth almost \$270 million, up more than 60 percent in volume and more than 50 percent in value. Mexico, Poland, and Ethiopia received close to half the value of the shipments. Nonfat dry milk shipments of about 260,000 tons accounted for almost 60 percent of the value and more than 75 percent of the volume. Shipments of cheese and anhydrous milk fat totaled roughly 35,000 tons each, worth about \$70 million and \$38 million, respectively. Relatively small amounts of butter and dried milk cream were shipped as well. A small amount of bulgur wheat was shipped for the first time. The 1985 figures compare with 1984 shipments of approximately 140,000 tons of nonfat dry milk, about 45,000 tons of butter, and 10,000-15,000 tons of cheese and anhydrous milk fat each. Poland, Brazil, and Mexico received about 66 percent of the value and volume of shipments in 1984.

#### Commodity Import Program

Shipments under the 1985 Commodity Import Program (administered by the Agency for International Development) totaled slightly more than 793,000 tons worth in excess of \$110 million compared with 1984 shipments of 586,000 tons worth \$97 million. Corn accounted for nearly \$71 million worth of the 1985 shipments and wheat almost \$27 million; corn accounted for about \$77 million worth in 1984. All of the corn went to Egypt in both years. Wheat went solely to Pakistan in 1985; none was shipped in 1984. (Mark E. Smith, International Aggregate Analysis Branch, and Fanny G. Lockley, International Economic Indicators Branch)

# Japan Remains Top U.S. Farm Market

Japan is forecast to remain the leading single-country market for U.S. agricultural exports in fiscal year (FY) 1986, as it has been every year since 1963. U.S. agricultural sales to Japan peaked in FY 1984 at \$6.9 billion, fell to \$5.7 billion in 1985, and are forecast to drop to under \$5 billion in FY 1986, the lowest level since 1979. Depressed commodity prices and declining U.S. shares in key markets are behind the decline.

The Japanese market is a large and steady one for many U.S. agricultural products. The country usually ranks first or second in value as an importer of such major U.S. farm exports as wheat, corn, sorghum, soybeans, cattle hides, cotton, tobacco, citrus fruit, beef and veal, pork, and poultry meat. In recent years, a rising share of the value of U.S. agricultural exports (around 18 percent) has been going to Japan, while the share to Western Europe has been declining.

Japan is a significant market for other agricultural exporters as well, such as New Zealand, Canada, and Australia, but has taken a declining share of exports from the latter two over the last decade. Canadian farm exports have shifted increasingly towards the United States, USSR, and China, and Australian exports have been moving towards the Middle East, China, and other Asian countries. In the last 2 years, Japan has become a leading destination for corn and cotton from China, which is pushing agricultural exports as a means of reducing its bilateral trade deficit with Japan. As a result of a surge in imports of consumer items to China, following its relaxation of import controls in 1984, Japan's trade surplus with China jumped to a record \$6 billion in 1985, up from \$1.3 billion in 1984.

Although U.S. agricultural trade with Japan relies predominantly on bulk commodities, such as grain and soybeans, the United States recently has been promoting expansion of trade in high-value and processed products, including beef and citrus. In 1984, the United States and Japan concluded talks on beef and citrus, which enlarged Japanese quotas on beef, fresh oranges, and citrus juice. Japan agreed to expand imports of grain-fed beef (mostly of U.S. origin) 6,900 tons each year through Japan fiscal year 1987 (April 1987-March 1988). Japan also agreed to increase fresh orange imports 11,000 tons annually during the same period. <sup>1/</sup>

As a result, the U.S. share of Japan's beef imports has risen, reaching 31 percent in 1985, up from 29 percent in 1984. Other major suppliers of beef are Australia and New Zealand. U.S. sales of beef offals to Japan, which fall outside quota restrictions, have also been growing. Beef offals are an important component of U.S. beef trade with Japan, accounting for about 18 percent of the value in 1985.

The United States dominates the fresh orange trade with Japan, supplying nearly all of its imports. Small quantities also come from Australia, Taiwan, and South Africa.

The United States is the predominant supplier of many agricultural products to Japan, providing around 40 percent of the value of Japanese agricultural imports in recent years. However, the U.S. share of Japan's imports declined notably last

---

<sup>1/</sup> See William T. Coyle, The 1984 U.S.-Japan Beef and Citrus Understanding: An Evaluation. FAER-222. U.S. Dept. of Agr., Econ. Res. Serv., July 1986.

year for several important commodities, including corn, soybeans, and cotton. China's emergence as an agricultural exporter, uncompetitive U.S. prices, and Japan's dissatisfaction with the quality of U.S. grains and oilseeds were chiefly responsible for the drop in the U.S. share in these markets. In addition, the U.S. share of Japan's pork imports fell to a low 6 percent, hurt by the strong dollar, high U.S. prices, and strong competition from Denmark and Taiwan. The U.S. share of Japan's poultry meat imports also declined because of competition from Thailand and Brazil.

### Commodity Highlights

Corn. The United States has been the predominant supplier of corn to Japan, its share averaging around 90 percent during 1980-84. The U.S. share dropped substantially in 1985 to 77 percent as a result of competition from China and Argentina. Japan imported 2.6 million tons of corn from China in 1985 and a record high of 466,000 tons from Argentina. The U.S. share could fall further this year because of continued strong competition from Chinese and Argentine corn and the re-emergence of South African corn. Japanese traders have arranged to import around 200,000 tons of Chinese corn each month through next April.

Sorghum. The U.S. share of Japan's sorghum imports has been much less stable than that for corn. The United States has usually supplied less than half of Japan's imports, but the U.S. share depends largely on whether Argentina, the strongest U.S. competitor, is ready to supply the grain. For example, during 1980-81, at the time of the U.S.-Soviet grain embargo, the U.S. share averaged 88 percent, as Argentina opted to supply sorghum to the Soviet Union, but fell to 23 percent in 1983 when Argentina re-entered the Japanese market.

Soybeans. The United States is the largest soybean supplier to Japan, its market share averaging around 95 percent during 1980-84. Japan traditionally imports a small portion (200,000-300,000 tons) of food-quality soybeans from China each year. The U.S. share declined in 1985 to 88 percent because of larger than usual imports from Brazil, which had an abundance of good quality beans. In recent years, Brazil has concentrated on exporting soybean products and has replaced the United States as Japan's major soybean supplier. Japan also purchases soybean meal from China.

Wheat. The U.S. share of Japan's wheat imports has remained very stable over the past decade, staying between 55-60 percent. Australia and Canada share the remainder, and maintain informal annual supply arrangements with Japan.

Cotton. Japan has been a large and fairly stable market for U.S. cotton exports. The U.S. share averaged 45 percent during 1980-84, declined to 41 percent in 1985, and could shrink to around 20 percent in 1986. Competition from China, Pakistan, Australia, and other suppliers and uncompetitive U.S. prices have caused the decline in U.S. share. U.S. cotton exports to Japan should pick up after August 1 when the cotton provisions of the new U.S. farm legislation take effect. The new program will make U.S. cotton prices more competitive.

Tobacco. The United States supplies over 60 percent of Japan's annual tobacco imports. To support its domestic tobacco industry and produce a better tasting product, Japan blends imported tobacco with Japanese leaf in manufacturing

cigarettes. As Japanese manufacturers increase production of milder, American-type cigarettes, preferred by consumers, the U.S. share of Japan's tobacco leaf imports will likely increase.

Cattle Hides. The United States is the predominant supplier of cattle hides to Japan, its market share averaging around 85 percent in recent years. Japan imports the raw hides and manufactures leather products primarily for the domestic market. Stagnation in the leather goods industry will constrain near-term growth in U.S. exports of cattle hides to Japan.

The effect of changes in the dollar-yen relationship and U.S. farm policy on U.S. agricultural sales to Japan is not clear. A weaker dollar (the dollar has depreciated about 35 percent against the yen since September 1985) does not necessarily put the United States in a better competitive position in the Japanese market because the currencies of major U.S. agricultural competitors such as Australia, Argentina, and Canada have weakened nearly the same amount against the yen. But U.S. farm exports should do better vis-a-vis products from countries whose currencies have appreciated against the dollar, such as European currencies. In addition, as U.S. grain and cotton prices become more competitive under the new farm legislation, the U.S. share of Japan's corn and cotton imports is likely to improve, although the United States will continue to face strong competition.

The higher valued yen, if sustained, and lower expected grain prices are likely to help Japan's livestock industry. Stable producer prices and declining feed prices have improved profit margins for livestock producers since May 1985. If these trends continue, imports of coarse grains and oilseeds should increase.  
(Lois A. Caplan, Asia Branch)
